KINCROME PT18

18V Blower

K23032

ED1 DECEMBER 2023

General Power Tool Safety Warnings

K23032

WARNING Read all safety warnings and all instructions. *Failure to follow the warnings and instructions may result in electric shock, fire and/or serious injury*. **Save all warnings and instructions for future reference.** *The term "power tool" in the warnings refers to your mains-operated (corded) power tool or battery-operated (cordless) power tool.*

1) Work area safety

a) Keep work area clean and well lit. *Cluttered or dark areas invite accidents.*

b) Do not operate power tools in explosive atmospheres, such as in the presence of flammable liquids, gases or dust. *Power tools create sparks which may ignite the dust or fumes.*

c) Keep children and bystanders away while operating a power tool. *Distractions can cause you to lose control.*

2) Electrical safety

a) Power tool plugs must match the outlet. Never modify the plug in any way. Do not use any adapter plugs with earthed (grounded) power tools. *Unmodified plugs and matching outlets will reduce risk of electric shock.*

b) Avoid body contact with earthed or grounded surfaces, such as pipes, radiators,ranges and refrigerators. *There is an increased risk of electric shock if your body is earthed or grounded.*

c) Do not expose power tools to rain or wet conditions. *Water entering a power tool will increase the risk of electric shock.*

d) Do not abuse the cord. Never use the cord for carrying, pulling or unplugging the power tool. Keep cord away from heat, oil, sharp edges or moving parts. *Damaged or entangled cords increase the risk of electric shock.*

e) When operating a power tool outdoors, use an extension cord suitable for outdoor use. *Use of a cord suitable for outdoor use reduces the risk of electric shock.*

f) If operating a power tool in a damp location is unavoidable, use a residual current device (RCD) protected supply. *Use of an RCD reduces the risk of electric shock.*

3) Personal safety

a) Stay alert, watch what you are doing and use common sense when operating a power tool. Do not use a power tool while you are tired or under the influence of drugs, alcohol or medication. *A moment of inattention while operating power tools may result in serious personal injury.*

b) Use personal protective equipment. Always wear eye protection. *Protective equipment such as dust mask, non-skid safety shoes, hard hat, or hearing protection used for appropriate conditions will reduce personal injuries.*

c) Prevent unintentional starting. Ensure the switch is in the off-position before connecting to power source and/or battery pack, picking up or carrying the tool. *Carrying power tools with your finger on the switch or energising power tools that have the switch on invites accidents.*

d) Remove any adjusting key or wrench before turning the power tool on. *A wrench or a key left attached to a rotating part of the power tool may result in personal injury.*

e) Do not overreach. Keep proper footing and balance at all times. *This enables better control of the power tool in unexpected situations.*

f) Dress properly. Do not wear loose clothing or jewellery. Keep your hair, clothing and gloves away from moving parts. *Loose clothes, jewellery or long hair can be caught in moving parts.*

g) If devices are provided for the connection of dust extraction and collection facilities, ensure these are connected and properly used. *Use of dust collection can reduce dust-related hazards*.

4) Power tool use and care

a) Do not force the power tool. Use the correct power tool for your application. *The correct power tool will do the job better and safer at the rate for which it was designed.*

b) Do not use the power tool if the switch does not turn it on and off. *Any power tool that cannot be controlled with the switch is dangerous and must be repaired.*

c) Disconnect the plug from the power source and/or the battery pack from the power tool before making any adjustments, changing accessories, or storing power tools. *Such preventive safety measures reduce the risk of starting the power tool accidentally.*

d) Store idle power tools out of the reach of children and do not allow persons unfamiliar with the power tool or these instructions to operate the power tool. *Power tools are dangerous in the hands of untrained users.*

e) Maintain power tools. Check for misalignment or binding of moving parts, breakage of parts and any other condition that may affect the power tool's operation. If damaged, have the power tool repaired before use. *Many accidents are caused by poorly maintained power tools.*

f) Keep cutting tools sharp and clean. *Properly maintained cutting tools with sharp cutting edges are less likely to bind and are easier to control.*

g) Use the power tool, accessories and tool bits etc. in accordance with these instructions, taking into account the working conditions and the work to be performed. *Use of the power tool for operations different from those intended could result in a hazardous situation.*

5) Battery tool use and care

a) Recharge only with the charger specified by the manufacturer. *A charger that is suitable for one type of battery pack may create a risk of fire when used with another battery pack.*

b) Use power tools only with specifically designated battery packs. *Use of any other battery packs may create a risk of injury and fire.*

c) When battery pack is not in use, keep it away from other metal objects, like paper clips, coins, keys, nails, screws or other small metal objects, that can make a connection from one terminal to another. *Shorting the battery terminals together may cause burns or a fire.*

d) Under abusive conditions, liquid may be ejected from the battery; avoid contact. If contact accidentally occurs, flush with water. If liquid contacts eyes, additionally seek medical help. *Liquid ejected from the battery may cause irritation or burns.*

6) Service

a) Have your power tool serviced by a qualified repair person using only identical replacement parts. *This will ensure that the safety of the power tool is maintained.*

1) Do not start the tool when it is upside down or when it is not in the operating position.

2) Switch the motor off and remove the battery when the tool is not being used, left unattended, being cleaned or being moved from one place to another.

3) Do not operate the tool near people, especially children or pets. Turn it off if they get too close. Maintain a safe distance of at least 5m from other people when using the tool.

Additional Safety Instructions Blowers

K23032

4) *Never direct the blower direction nozzle towards bystanders or pets. Never blow debris in the direction of bystanders or pets. The operator is responsible for accidents or hazards occurring to other people or their property.*
5) *Do not handle the battery or the tool with wet hands and do not use the tool in the rain.*
6) *Keep all the air intakes and the blower tube free of dust, lint, hair and other material that may cause a reduction in air flow.*
7) *Keep a balanced and stable stance while using the tool. Do not switch on the tool in enclosed or poorly ventilated spaces or in the presence of inflammable and/or explosive substances such as liquids, gasses and powders.*
8) *Do not get distracted and always concentrate on what you are doing. Use common sense. Never operate the tool when you are tired, sick or under the influence of alcohol or other drugs.*
9) *Do not operate this appliance with long loose hair or loose fitting jewellery. Tie long loose hair back and remove loose fitting jewellery.*
10) *Only operate the tool during broad daylight or with adequate artificial light.*
11) *When the tool is not in use, store it in a dry place and out of reach of children.*
12) *Only use the tool according to the instructions given in this manual.*
13) *Check regularly that the screws are tight.*

1) *Training*
   - *Read the instructions carefully. Be familiar with the controls and the proper use of the appliance.*
   - *Never allow children to use the appliance.*
   - *Never allow people unfamiliar with these instructions to use the appliance. Local regulations may restrict the age of the operator.*
   - *Never operate the appliance while people, especially children, or pets are nearby.*
   - *The operator or user is responsible for accidents or hazards occurring to other people or their property.*

2) *Preparation*
   - *While operating the appliance, always wear substantial footwear and long trousers.*
   - *Do not wear loose clothing or jewellery that can be drawn into the air inlet. Keep long hair away from the air inlets.*
   - *Wear protective goggles while operating*
   - *To prevent dust irritation the wearing of a face mask is recommended*
   - *Before using, check the supply and extension cord for signs of damage and aging. Do not use the appliance if the cord is damaged or worn.*
   - *Never operate the appliance with defective guards or shields, or without safety devices, for example debris collector in place.*

3) *Operation*
   - *Disconnect the appliance from the battery pack*
     - *whenever you leave the machine;*
     - *before clearing a blockage;*
     - *before checking, cleaning or working on the appliance;*
     - *if the appliance starts to vibrate abnormally.*
   - *Operate the appliance only in daylight or in good artificial light.*
   - *Do not overreach and keep your balance at all times.*
   - *Always be sure of your footing on slopes.*
   - *Walk, never run.*
   - *Keep all cooling air inlets clear of debris.*
   - *Never blow debris in the direction of bystanders.*

4) *Maintenance and storage*
   - *Keep all nuts, bolts and screws tight to be sure the appliance is in safe working condition.*
   - *Check the debris collector frequently for wear or deterioration.*
   - *Replace worn or damaged parts.*
   - *Use only genuine replacement parts and accessories*
   - *Store the appliance only in a dry place.*

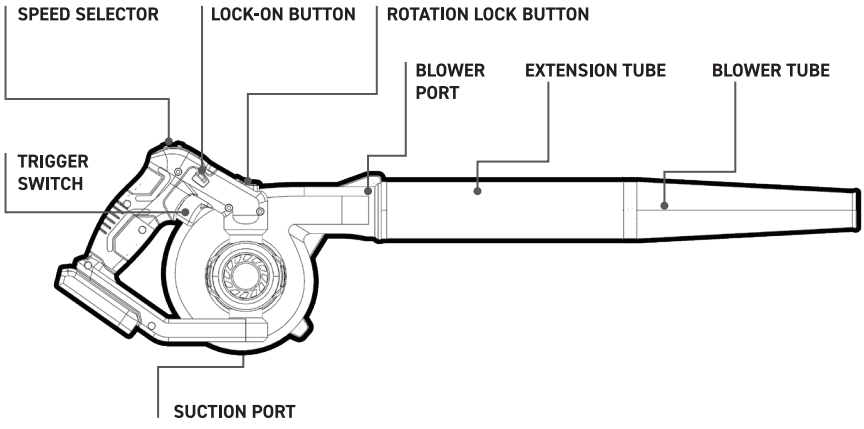

Symbols

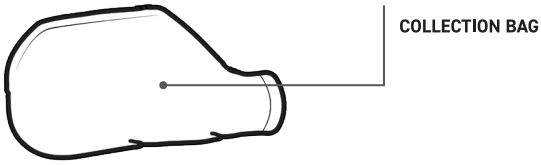

The rating plate on your tool may show symbols. These represent important information about the product or instructions on its use.

	Direct current, DC		Waste electrical products should not be disposed of with household waste. Please recycle where facilities exist. Check with your Local Authority or retailer for recycling advice.
	Refer to instruction manual/booklet		
	Wear ear protection		General warning
	Wear eye protection		Regulator compliance mark
	Wear respiratory protection		Do not use in the rain or leave the blower outdoors while raining.
	Rotating fans. Keep hands and feet out of openings while the product is running.		Keep bystanders away. Do not operate whilst people especially children or pets are in the area.

K23032

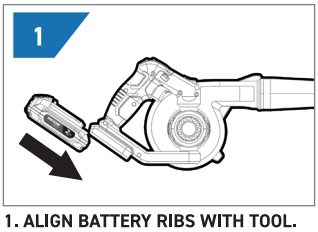

Specifications

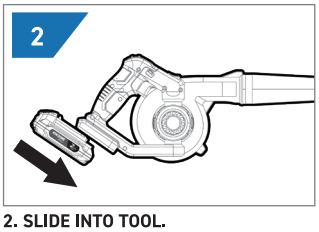

Voltage	18V d.c.
Vacuum	≥4.5KPa
Number of speed settings	3

Air flow speed 1	240km/h, 67.4m/s
Air flow speed 2	180km/h, 50m/s
Air flow speed 3	130km/h, 36.1m/s
No load speed 1	0-11,000 min^{-1}
No load speed 2	0-14,000 min^{-1}
No load speed 3	0-18,000 min^{-1}

How To Insert Battery On Tool

1. ALIGN BATTERY RIBS WITH TOOL.

2. SLIDE INTO TOOL.

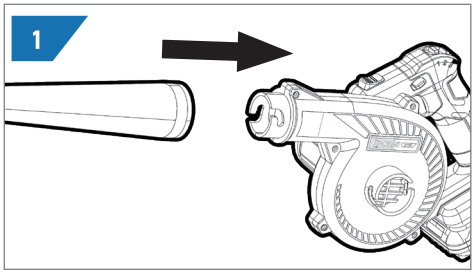

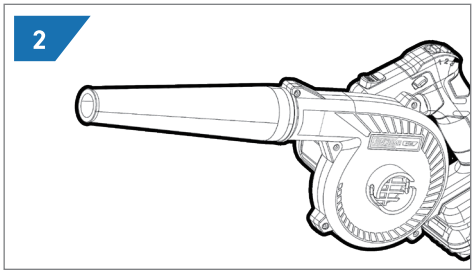

3. STOP WHEN YOU HEAR IT CLICK IN PLACE.

Fitting the Blower Accessories

K23032

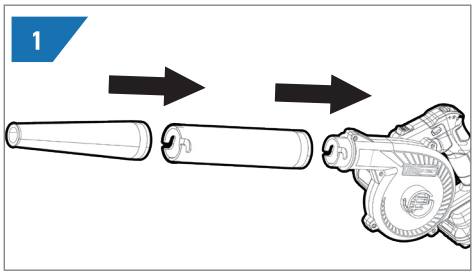

WARNING! Do not attempt to operate or disassemble the safety switch by any means other than the normal assembly.

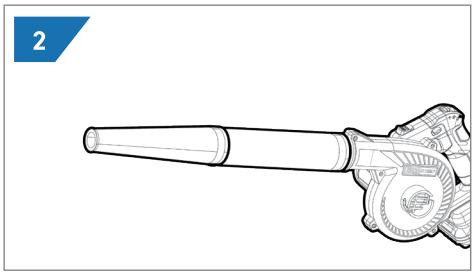

ASSEMBLE THE BLOWER TUBE.

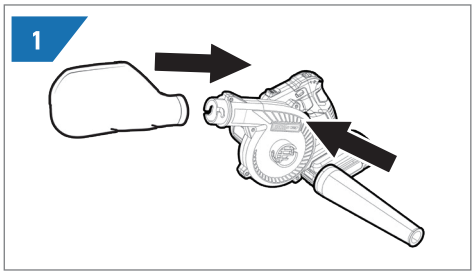

Align the tab located on the blower tube with the corresponding indentation on the blower port or suction port.
Push and then rotate the tube until it securely locks into position.

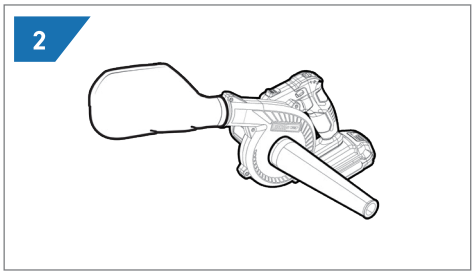

ASSEMBLE THE EXTENSION TUBE.

To assemble the extension tube remove the blower tube, then align the tab located on the extension tube with the corresponding indentation on the blower port or suction port. Now the blower tube can be assembled to the extension tube.

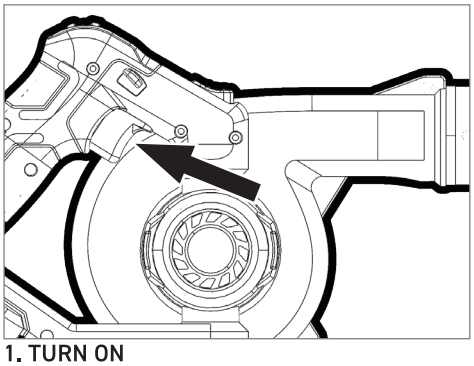

ASSEMBLE THE COLLECTION BAG.

Align the tab located on the collection bag with the corresponding indentation on the blower port.
Push on and then rotate the tube until it securely locks into position.
Note: The blower tube is required to be fitted to the suction port for this application.

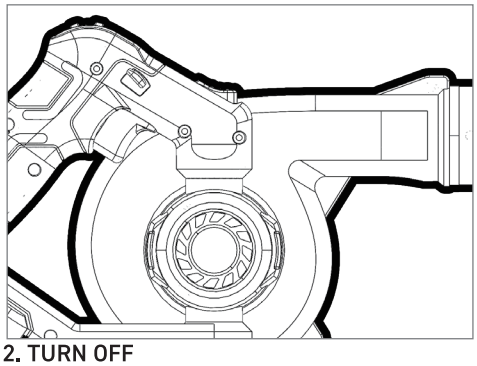

Turning on/off the Blower

K23032

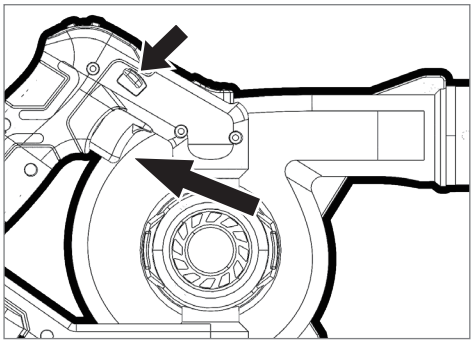

1. TURN ON

To start the blower, squeeze the trigger switch.

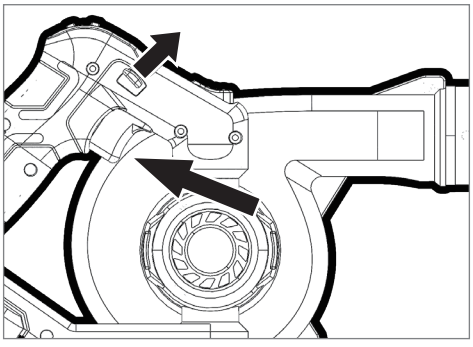

2. TURN OFF

Release the trigger switch.

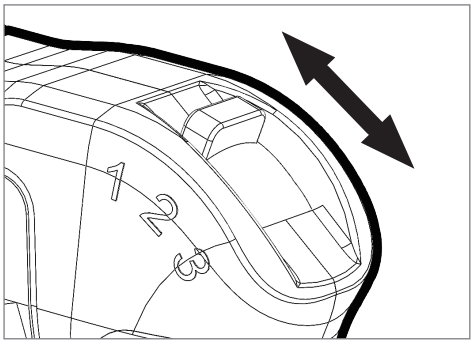

3. LOCK-ON THE TRIGGER

To start the blower, squeeze the trigger switch and press the lock on button at the same time.

4. DISENGAGE THE LOCK FEATURE

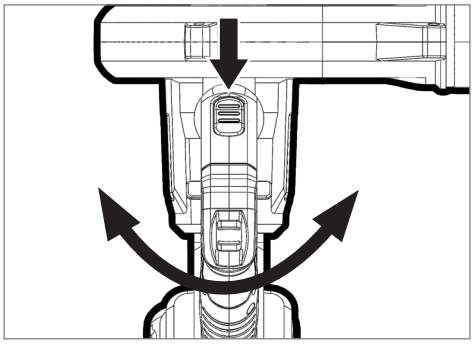

To stop the blower, press the trigger switch and the self-locking trigger resets.

5. ADJUST THE SPEED

The blower has three speed settings. To select a speed, push the speed selector into the desired position.

1 slow speed, 2 medium speed, 3 high speed.

6. ROTATE THE HANDLE

Push the rotation lock button and rotate the handle to the desired position.

How to use the Blower

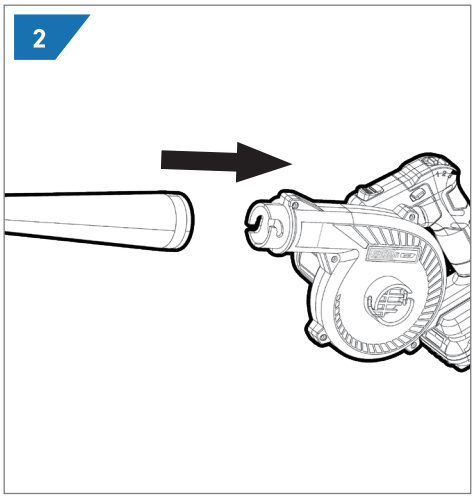

K23032

CAUTION: Be aware of other people, animals and objects in the area where you are to be operating the blower.

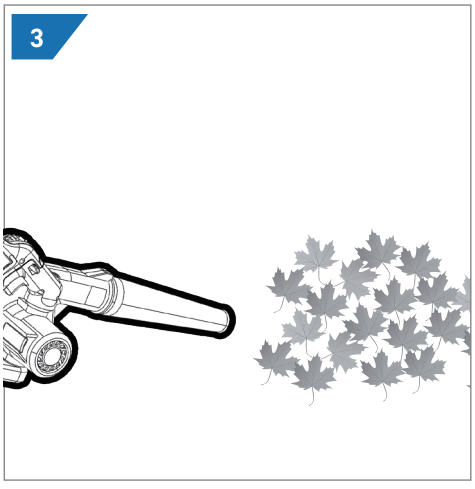

1. ENSURE SAFETY

Always wear safety glasses when working with the blower.
Make sure to secure your hair and any baggy clothes.
In appropriate situations make sure you wear ear muffs, a mask or a respiratory mask.

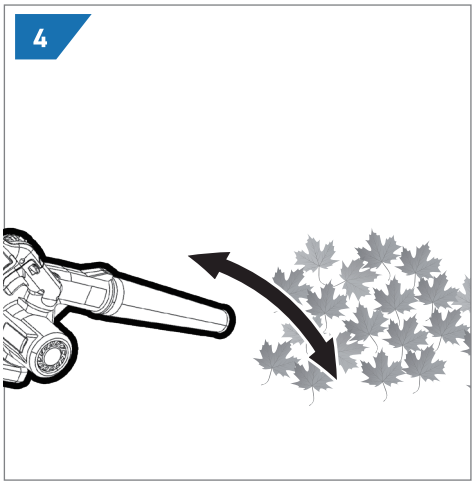

2. MAKE SURE TUBES ARE CONNECTED

Always ensure the accessories being used, being the blower tube, extension tube or collection bag is firmly fitted before using the product.

3. HOLD THE BLOWER FIRMLY

Firmly grasp the blower, depress trigger switch.

4. BLOWING DEBRIS

Use swinging motion while walking forward.

Maintenance

K23032

This power tool normally requires no maintenance; from time to time the ventilation slots on the motor casing should be cleaned out. If the unit should become defective, repair should be performed by an authorized service agent for electric tools.
Avoid using solvents when cleaning plastic parts. Most plastics are susceptible to damage from various types of commercial solvents and may be damaged by their use. Use clean cloths to remove dirt, dust, oil, grease, etc.

Warning!
Do not at any time let brake fluids, gasoline, petroleum based products, penetrating oils, etc., come in contact with plastic parts. Chemicals can damage, weaken or destroy plastic which may result in serious personal injury.
